ABOUT ME

I am passionate about technology and its potential to improve our lives by providing new ways to interact and make meaningful connections. I strongly believe that awareness of technology makes us more responsible and leads us to new and exciting perspectives. I'm always ready to help people create amazing projects and seize the opportunities offered by the digital world.

WORK EXPERIENCE

Agile Project Manager

B&A Consulting [04/2021 – Current]

Country: Italy

As Agile Program Manager at B&A Consulting, I worked as Contractor Associate Project Manager for Publicis Sapient, with the responsibility of managing European websites based on Adobe Experience Manager for Stellantis Ex CSI Group brands: Maserati, DS, Opel, Peugeot.

My responsibilities included monitoring content updates on these brands' websites and coordinating with colleagues to ensure tasks were completed in a timely manner to meet tight deadlines. Also, I have been entrusted with training overseas teams on using these platforms on various occasions.

I was proud to be able to increase the productivity of my colleagues through my work methods, creating a dashboard optimized for Jira and developing a Chrome extension that simplified tasks by automating some procedures.

Subsequently, I was assigned to Astara (Stellantis importer in Switzerland) for the full year 2022. During this period, I managed all Ex FCA websites for the following brands: FIAT, Alfa Romeo, Jeep, Abarth Fiat Professional, Lancia.

Also in this position, I held the role of Contractor Associate Project Manager for Publicis Sapient, dealing with the management of European websites based on Adobe Experience Manager for the brands of the Stellantis Ex FCA Group. I continued to oversee content updates on these brands' websites and coordinate with colleagues to ensure tasks were completed on time to meet strict deadlines.

Thanks to my project management skills and my ability to adopt agile methodologies, I ensured the success of these operations and consolidated my role as a trusted figure in the management of complex projects in the e-commerce and websites sector. My dedication and contributions have contributed to an optimal user experience for clients and have sustained the excellence of the Stellantis Group brands.

IT Consultant

We-Tech Srl [01/2021 – 11/2021]

City: Vado Ligure

Country: Italy

Website: <https://we-tech.com>

Business or sector: Information and communication

As an IT Consultant and Service Specialist at We-Tech, I have played a key role in managing and implementing services such as Microsoft 365 for large companies with over 5000 employees. My strategic presence has ensured the success of projects and the maintenance of operational activities efficiently.

My key skills include:

- Microsoft 365 Rollout and Maintenance Management: Led the process of deploying and maintaining Microsoft 365 services for major enterprises, ensuring smooth adoption and optimized performance.
- SPOC Management: I was the Single Point of Contact for the management of operational activities and communications between the client and our company, ensuring a smooth workflow and effective communication.
- Remote Technical Support: Provided remote technical support for over 300 PCs and devices, promptly resolving issues and ensuring systems were running smoothly.

I had the honor of collaborating with prestigious companies such as Sharp, Publicis Sapient and B&A Consulting (to which I was later sold), providing customized and high quality solutions to meet their business needs. Thanks to my experience and technical skills, I contributed to the success of the operations and consolidated our reputation as a reliable partner in the IT services sector.

Problem Solver

FIEGE Logistics S.p.a. [11/2020 – 01/2021]

City: Stradella

Country: Italy

Website: <https://www.fiege.com/it/>

Business or sector: Transportation and storage

As a Problem Solver at FIEGE, I played a crucial role in solving logistics problems and implementing process improvements. My strategic presence has made it possible to optimize the efficiency of operations and to face daily challenges successfully.

My responsibilities have included:

- In-depth analysis of logistics problems: I have identified and analyzed critical issues in logistics processes, identifying areas for improvement to increase efficiency and reduce errors.
- Solution Design and Implementation: Developed innovative solutions and operational strategies, working closely with the team to ensure effective implementation of improvements.
- Performance monitoring and evaluation: I have constantly monitored the results of the actions taken, measuring the effectiveness of the solutions adopted and making further optimizations, if necessary.
- Cross-Functional Collaboration: I worked in synergy with different business divisions, establishing effective communication to ensure a harmonious and unified workflow.

My constant commitment to solving logistical challenges and making improvements has contributed to the success of the company, consolidating its reputation as a reliable partner in the logistics sector and opening new growth opportunities. My proactive and result-oriented attitude has enabled me to successfully tackle complex challenges and maintain a high standard of performance within the logistics operations.

DevOps Technical Lead

Stone Cash [02/2020 – 06/2023]

Website: <https://www.smartfair.live/>

Name of unit or department: Smart Fair

Link: <https://www.youtube.com/watch?v=7H5ZU3elp9I>

As a DevOps, I had the honor of creating and managing the infrastructure for the first smart fair in the marble industry at <https://SmartFair.Live>. My strategic presence was crucial to the success of the event, as I provided key technologies and infrastructure expertise.

My skills have proved to be essential to complete this challenge:

- Linux server configuration and management: Optimized the Linux server environment to ensure high performance and stability throughout the show.
- Video conferencing system creation and management: I implemented a highly scalable and reliable video conferencing system, enabling a vast pool of 60,000 visitors to interact and participate efficiently in real time.
- Server load balancing infrastructure management: I developed a solid server load balancing infrastructure, without the need to resort to virtualization services such as Docker or Kubernetes, ensuring an optimal distribution of resources.

Thanks to my technical skills and my dedication, SmartFair.Live has become a successful reality, opening up new opportunities in the sector and demonstrating my ability to tackle innovative projects.

Founder

RTFM Group [20/11/2019 – Current]

City: Santa Giuletta (PV)

Country: Italy

Website: <https://rtfm.pro>

Email address: amministrazione@rtfm.pro

As a co-founder and partner of RTFM Group, I helped bring this company to life and played a key role in its growth and development. My position allows me to maintain a level of flexibility and freedom, allowing me to manage my time efficiently.

RTFM Group is a company in the sectors of information technology, hydraulic plant engineering and electrical plant engineering. Our highly skilled team is able to meet the daily challenges and manage the primary operations of the company. This has given me the opportunity to devote time to other business ventures and my personal and professional growth, without compromising the excellence of our performance.

Although I maintain a strategic involvement in the company, the work team is able to operate autonomously and deal with operational activities. This balance allows me to explore new opportunities and pursue my passions, while at the same time ensuring that the company's vision and mission are always kept at the heart of our operations.

In summary, as the founder and partner of RTFM Group, I am free enough to explore other opportunities and pursue my passions, while our highly skilled team successfully manages the core business of the company. My strategic presence and support continue to lead the company to new heights of excellence in the industries in which we operate.

Chief Technology Officer - CTO

Gruppo Imprecos [01/06/2018 – 01/01/2019]

Country: Italy

Business or sector: Construction

As Chief Technology Officer (CTO) at Gruppo Imprecos, I achieved outstanding results during my experience, marking new milestones in the technology sector and opening unprecedented opportunities for the company.

First of all, it was a moment of great pride to have acquired a giant like China Telecom as a customer, which until then had never had collaborations outside Asia. Thanks to my commitment and the ability to build a solid partnership, we have managed to take such an influential company outside the Asian borders, thus boasting of an absolute supremacy. The collaboration with China Telecom has assumed crucial importance, having contributed to consolidating our reputation as a leading company in the sector, capable of opening new markets and successfully tackling international challenges.

Furthermore, our dedication has led to another significant result: the partnership with VIP.com, one of the first companies in Asian e-commerce. Through our continued efforts, we have enabled VIP.com to open its first logistics facility in Europe, an unprecedented accomplishment for the company. This has further strengthened our position as a strategic point of reference for international companies looking for expansion and growth in the European market.

We also closely followed the establishment of the first headquarters of OPPO Mobile, a renowned smartphone manufacturer. Our presence and support in the creation of this headquarters have demonstrated our ability to manage projects of international scope and our role as a trusted partner for the largest companies.

It should be emphasized that all of these partners, such as VIP.com and China Telecom, had no headquarters in Italy and even no presence in Europe. Thanks to our expertise and dedication, we have been able to open new opportunities for them, fostering the growth and expansion of these companies in international markets.

My role as CTO at Imprecos Group has therefore been characterized by significant successes, which have helped to strengthen our position as a leading company in the technology sector and to consolidate valuable partnerships with leading international clients. The ability to successfully manage complex and global projects has allowed us to be a strategic point of reference for technological innovation and for the expansion of influential companies on an international scale.

Site Manager & IT Manager

Dematic [01/06/2017 – 01/06/2018]

Country: Italy

Website: <http://www.dematic.com/it-it/>

As Site Manager and IT Manager at Dematic, I played a crucial role in the management and coordination of activities at the logistics sites of the prestigious clients OVS and XPO Logistics in Pontenure (PC).

My primary responsibility was managing the onsite support people, ensuring operational excellence and a high level of customer service. I coordinated the maintenance and repair of the logistics systems, with particular attention to the analysis of failure prevention to ensure a continuous and efficient operation of the structures.

Furthermore, I had the key role in IT management, ensuring the proper functioning of IT systems and the security of sensitive information. My activity included the management of network and logistics infrastructure and information systems, ensuring a stable and reliable technological environment for the client.

A key aspect of my role was coordinating between the customer and Dematic, ensuring clear and effective communication and providing a strategic point of reference to meet specific customer needs. My constant presence on the site has made it possible to promptly deal with requests and to guarantee a quick and targeted solution to any problem.

During my experience, I have carried out in-depth analyzes for IT and infrastructural improvement proposals and for internal and external management and communication. I identified process optimization opportunities and implemented innovative solutions to increase the efficiency and productivity of logistics sites.

In summary, as Site Manager and IT Manager at Dematic, I played a crucial role in ensuring effective operations management at the logistics sites of OVS and XPO customers. My presence in the field, the management of human resources and the care of IT systems have contributed to providing a high quality service, guaranteeing an efficient and cutting-edge operating environment. My attention to improvement proposals has enabled the implementation of innovative and strategic solutions to optimize operations and meet customer needs in a timely and effective manner.

After Sale Service Specialist

OCM S.r.l. [01/09/2016 – 01/06/2017]

Address: Via Emilio Gino Segrè, 5/a, 43122 Parma (Italy)

Website: <https://www.ocm.eu>

Business or sector: Professional, scientific and technical activities

During my involvement as After Sale Service Specialist at OCM, I had the opportunity to manage and coordinate over 200 technical intervention teams nationally and internationally, providing support to customers in the logistics automation sector.

My entry into OCM was made possible thanks to the granting of the position by the previous FBA company, where I acquired valuable skills that allowed me to better face this role. My main responsibilities included the configuration of IT systems for logistics, coordination of technical interventions and assistance to IT systems, ensuring effective operation of IT solutions used in logistics processes.

Technical assistance has been an essential component of my work, since I was able to interact directly with customers, providing immediate and professional responses to solve any technical problems, ensuring the smooth running of activities and the management of any on-site interventions in the tight deadlines determined by the contract SLAs.

A fundamental point of my experience was the optimization of organizational and development processes, where I worked closely with the internal team to implement strategies for improvement and growth of the company.

However, unfortunately, for family reasons I had to make the difficult decision to leave my job and follow the needs of my family, making a permanent move to Parma, where the company headquarters were located, impossible. Despite this challenge, I faced each day with dedication and passion, going back and forth every day to cover the 115km distance from the headquarters. My determination and commitment have allowed me to guarantee maximum professionalism and continuity in my position, ensuring constant support to customers and effective management of the intervention teams. Throughout my position, I have tried to reconcile work responsibilities with family commitments, demonstrating a great sense of responsibility and adaptability.

Although my experience ended for personal reasons, I am grateful for the opportunities and challenges I faced during my journey in OCM. The position has allowed me to grow professionally and to contribute to the success of the company, consolidating my interest and passion for managing situations in which promptness of analysis and analytical skills are essential.

AfterSales Service Manager

FBA Italy [01/08/2013 – 01/09/2016]

City: Bereguardo (PV)

Country: Italy

Website: <https://www.fbaitaly.com/>

During my experience as IT AfterSales Service Manager at FBA, I managed in an effective and timely manner a number of key activities, ensuring a high level of service and meeting the needs of prestigious clients in the logistics sector, including DHL, SDA, TNT, BRT, GLS and FedEx.

Among my main responsibilities, I have successfully coordinated the emergency technical interventions of over 200 national and international teams located throughout Europe. I managed the maintenance and repair of the computers of the logistics systems of the various customers, ensuring the correct functioning of the systems in daily operations.

I had the opportunity to work directly on the configuration and functional tests of the computers dedicated to customers' plants, customizing the solutions according to the specific needs of each customer and installing them in their logistics plants, taking care of the verification tests of the quality necessary for the customer operation.

A particularly challenging aspect of my role has been the direct support provided to field operators and response mechanics. I ensured timely and professional technical assistance, solving any problems and ensuring operational continuity.

A challenging part of my job has involved traveling across Europe for FedEx customer rollouts, with around 3 European cities per week. I had the pleasure of managing these demanding transfers, maintaining high standards of efficiency and quality in providing customer assistance.

A moment of great honor and responsibility was the installation of the company's first logistics plant in Russia in complete autonomy. During this challenge, I had to make emergency software changes to fit the customer's specific needs and teach the customer how to operate the rig. Despite extremely tight deadlines, I won in this endeavor, demonstrating remarkable flexibility and ability to deal with complex situations.

My experience as IT AfterSales Service Manager at FBA allowed me to grow professionally and to develop management and technical skills, contributing to the company's success and consolidating our reputation as a reliable partner in the logistics sector.

Founder

VapeOn.Cloud Community [01/01/2016 – Current]

Website: <https://t.me/s/vapeoncloudit>

As Founder of the renowned VapeOn.Cloud Community, I successfully led and coordinated the project, playing a key role as Social Platforms Coordinator.

I started this exciting initiative initially on Telegram, where the community has recorded considerable success, attracting over 2000 active members in a completely organic way, without resorting to advertising campaigns. Despite the strict rules of behavior that we have structured within the community, I have worked with dedication to guarantee a welcoming and respectful environment, favoring interaction between vaping enthusiasts in a fluid and comfortable way.

VapeOn.Cloud had the honor of being the first community on Telegram dedicated to vapers, marking an important milestone in the field of vaping and becoming a point of reference for enthusiasts from all over Italy.

My negotiation and networking skills have enabled me to establish strategic partnerships with major marketplaces, manufacturers and suppliers, allowing us to offer exclusive discounts to our users. Through these partnerships, we've made special benefits and unique promotions available to our community, strengthening the bond with members and creating a rewarding experience for all.

Furthermore, I have promoted and organized meeting events between community participants, facilitating the meeting of people with common interests and creating an environment for sharing and exchanging experiences.

The VapeOn.Cloud Community was an amazing experience, a place where vapers could feel part of a united and inclusive community. My role as Founder and Coordinator represented an exciting challenge, where I was able to put my skills into play to develop and promote a dynamic, welcoming and successful community in the world of vaping, but unfortunately it was left out due to the new and complex regulations on vaping, especially with the introduction of excise duties by the state.

Webmaster & DevOps

Autoscuola Forze Armate II [08/2009 – Current]

Address: via delle forze armate, 232, 20152 Milano (Italy)

Website: <https://autoscuolaforzearmate.it>

As a WebMaster & DevOps on behalf of Autoscuola Forze Armate II, I played a crucial role in the management and maintenance of their web environment and IT infrastructure.

My responsibilities included selecting, configuring and maintaining servers, ensuring an effective and reliable online presence for the driving school. I also managed the DNS system, ensuring the website was easily accessible for users.

I took an active role in configuring the core of the site, optimizing the site's performance and security. In addition, I took care of the configuration and management of CDN and firewall, ensuring faster site loading speed and advanced protection against online threats.

The configuration of the mail server was another essential aspect of my work, guaranteeing an efficient and reliable e-mail system for the driving school.

During the time of the COVID-19 pandemic, I faced a unique challenge by building and configuring a custom video lessons solution based on open source technologies, including WebRTC. This solution has allowed the driving school to continue teaching activities remotely and securely, maintaining a high level of involvement and interaction with students.

My constant commitment and skills as a WebMaster and DevOps have helped ensure the correct functioning and security of the driving school website, providing technical support and optimizing the users' online experience.

VideoGame Project Manager

Bizart Srl (Giovanni Allevi) [2015 – 2016]

Address: Via Vigevano 24, 20144 Milano (Italy)

Website: <https://giovanniallevi.com>

As the creator and project manager of the Giovanni Allevi Love Runner video game, I had the privilege of leading an innovative project in the video game sector, with the aim of obtaining greater feedback on social media and actively involving users in the promotion of Allevi-related content .

In this challenging adventure, I had the pleasure of collaborating with Marco Pavone, a well-known computer graphics artist, who contributed his talent and creativity to the design of the game, making it visually captivating and engaging.

The project was a unique experience, allowing me to work closely with such important people in the music and visual art industry. The synergy between the musical talent of Giovanni Allevi and the skills of Marco Pavone in graphics has created an extraordinary game, which has been able to conquer the public and offer an unprecedented combination of entertainment and involvement for its fans.

Collaboration with such prestigious and competent professionals has made my role as creator and project manager even more rewarding and stimulating, leading to the creation of a successful project that has left a positive mark on the world of video games and in artistic and musical promotion.

Product Manager

TiEffeCi Srl [06/2012 – 2015]

City: Milano

Country: Italy

As Product Manager at TiEffeCi, I played a central role in the management and development of online marketing activities. I successfully coordinated several digital marketing campaigns, ensuring an effective and engaging web presence for the company.

My main responsibility was the creation of marketing campaigns and the maintenance of social channels, creating content strategies and targeted interactions to reach the target audience. I have worked passionately to provide an immersive and authentic experience through TiEffeCi's social channels.

Furthermore, I had the honor of commissioning and managing the Project Management of Apps developed for third parties. I have collaborated with teams of developers and professionals to ensure the realization of high quality applications, meeting specific customer needs and exceeding expectations.

My experience as Product Manager at TiEffeCi allowed me to combine creativity, expertise and strategy to develop successful projects in the field of online marketing and applications. The ability to effectively coordinate marketing activities, maintain a strong social media presence and successfully manage App commissioning has contributed to the company's continued success and customer satisfaction.

Product Development Manager

Heng An Micro-Electronics (Shenzhen) Co., Ltd [2011 – 2013]

City: Shenzhen

Country: China

As Product Development Manager, I had the opportunity to help expand an early stage market, focusing on the production of new NFC-enabled devices. My expertise has been fundamental in customizing the hardware and software features of the devices and adapting the Android kernel to meet the specific needs of the Italian market and customers.

A particular success in my career was the tablet produced under my own brand sold on myEfox, which proved to be the best-selling in 2012. This result was made possible thanks to the marketing strategies adopted and the software adaptation choices made by me . The ability to lead product development and innovation, combined with a strategic approach to marketing, has contributed significantly to the success of this technological device in the market.

This experience has allowed me to face complex challenges and achieve successful results, demonstrating competence in adapting products to market needs and in implementing effective marketing strategies. I am grateful for the opportunity to contribute to the progress of the company and to experience the fulfillment of ambitious goals in the field of technological innovation.

Android Firmware Developer

New Generation Mobile [2011 – 2012]

Address: Via Leonardo da Vinci, 7, S. Maria a Monte (PI) (Italy)

Website: <https://www.ngm.eu/>

As Android Firmware Developer for NGM, I had the important responsibility of redesigning the entire Android system for the NGM Droid Duo device. My main goal was to optimize the performance and stability of the device, as well as integrate new features to improve the user experience.

I have worked with dedication to write efficient and high quality code, ensuring optimal functioning of the Android operating system on the NGM Droid Duo. My experience and expertise in Android programming allowed me to overcome technical challenges and implement new features in an optimal and accurate way.

By developing the NGM Droid Duo Android system, I had the opportunity to actively contribute to the marketing of an innovative and cutting-edge device, offering an optimal and satisfying user experience. My passion for mobile development and my commitment to ensure performance and stability have made possible the success of the device in the market.

This experience has been gratifying, as I had the opportunity to contribute to the technological progress of the company and to put my skills into practice to offer high-level solutions in the field of programming for mobile devices.

iOS Developer

Zodiak Active Italia [10/2011 – 01/2012]

Address: P.zza Borgopila, 40, 16129 Genova (GE) (Italy)

Website: <https://www.zodiakactive.com/>

As an iOS Developer at Zodiak Active, I had the privilege of working on programming the dating application FlirtMaps, an application for Apple iOS devices. Using Objective-C on xCode 3, I helped develop and optimize this innovative social networking app.

My experience and knowledge in programming for iOS devices allowed me to write efficient and reliable code, ensuring optimal functioning of the FlirtMaps application. I worked hard to implement new features, improve user experience and ensure app stability on Apple devices.

Working with the Zodiak Active development team has been instrumental in the success of the FlirtMaps app. We worked together to overcome the technical challenges and meet the development goals, creating an application that users loved and engaging.

The experience has allowed me to grow professionally and to contribute to the progress of the company in the development of apps for Apple devices. I am grateful for the opportunity to work on such an interesting and challenging project, offering innovative solutions in the world of iOS programming.

Android Custom Firmware Developer

[2010 – 2015]

Website: <https://www.xda-developers.com/>

As an Android ROM Firmware Developer, I have played an integral role in designing and developing custom firmware for numerous Android devices. My main goal was to optimize device performance and integrate advanced features not included in the factory firmware.

I have worked hard to write efficient and reliable code, ensuring that Android devices run smoothly. My experience and expertise in the field have allowed me to identify areas for improvement and implement customized solutions to optimize device performance.

In addition, I designed and developed new features that were not present in the factory firmware, bringing rich and enriching user experiences to users. These new features have enriched the capabilities of Android devices, making them more versatile and adaptable to specific user needs.

My passion for innovation and my expertise in the design and development of Android firmware have allowed me to contribute to the technological progress of devices and to offer customized and high-performance solutions for users. I am grateful for the opportunity to work on inspiring projects and contribute to the successful performance of Android devices.

Project Manager & Point of Sale Developer (POS)

AWS Liguria [2011 – 2012]

City: Vado Ligure (SV)

Country: Italy

As Project and Development Manager for Point of Sale (POS) Solutions, I covered several key roles, including Project Manager and CMS Developer for POS solutions. In addition, I held the role of Research and Development Manager.

In my role, I actively participated in the selection of solutions for clients. I am proud to have been one of the pioneers in setting up the first iOS and Single Board PC based POS solution with a local web server.

My commitment to research and development has allowed me to contribute to the technological progress of POS solutions, offering customers cutting-edge and innovative solutions to manage their sales activities. My role as Project Manager allowed me to successfully coordinate projects, ensuring solutions were delivered efficiently and met specific customer needs.

Furthermore, as CMS Developer, I worked on the design and configuration of customized solutions for stores, ensuring an intuitive and high-performance user experience. Setting up the first iOS and Single Board PC based POS solution with a local web server was a milestone in providing advanced and tailored POS solutions for customers.

My passion for innovation and my experience in the field of POS solutions have allowed me to offer high quality and satisfying services to customers, helping them to optimize their sales operations and improve the efficiency of their business. I am grateful for the opportunity to contribute to the success and growth of the company, experiencing the fulfillment of ambitious goals in the field of POS solutions.

ORGANISATIONAL SKILLS

Organizational skills

My organizational skills include:

- **Leadership:** Currently, I lead free time projects in the IT sector, ranging in different fields. Thanks to my leadership, I can coordinate and direct teams of developers and collaborators, ensuring the effective implementation of projects and optimization of resources.
- **Project and Group Management:** I have a solid experience in managing complex projects and groups of people, acquired through my work experiences in various companies such as FBA, OCM, Dematic and RTFM Group. Even in situations of limited analytical time, I have demonstrated the ability to face challenges and solve problems, always keeping the efficiency and productivity of the team high.
- **Demonstrated skills:** My EasyBoss project, conceived and led by me, got the 2nd place at the BeMyApp in Bari. I selected and organized a group of talented developers to carry out the project, demonstrating my ability to bring together competent resources and guide them towards the common goal successfully.

Thanks to these organizational skills and my experience in various working contexts, I am able to confidently tackle complex IT projects and lead teams towards achieving the desired results.

PROFESSIONAL SKILLS

Professional skills

My professional skills include:

- **Quality analysis:** I have developed excellent expertise in quality analysis, especially in the logistics sector, where customers' quality and efficiency requirements are high. This skill allows me to carefully evaluate processes and results, identifying possible improvements and ensuring high quality standards.
- **Mentoring skills:** The companies I have worked for have recognized my mentoring skills, i.e. the ability to guide and support other people in developing their skills. My experience has enabled me to share knowledge and skills with colleagues and collaborators, facilitating the professional growth of the team.
- **Extended IT skills:** I have extensive IT skills, both acquired in the context of my work jobs and out of personal passion. My in-depth knowledge of information technologies allows me to face technical challenges with confidence and to use digital tools effectively to optimize work processes.

Thanks to these professional skills, I am able to guarantee high quality standards in projects and in daily operations, to guide and support the team through mentoring and to use IT skills to improve the efficiency and effectiveness of the work performed .

Community Management

Founder of VapeOn.Cloud community

As Founder of the renowned VapeOn.Cloud Community, I successfully led and coordinated the project, playing a key role as Social Platforms Coordinator.

I started this exciting initiative initially on Telegram, where the community has recorded considerable success, attracting over 2000 active members in a completely organic way, without resorting to advertising campaigns. Despite the strict rules of behavior that we have structured within the community, I have worked with dedication to guarantee a welcoming and respectful environment, favoring interaction between vaping enthusiasts in a fluid and comfortable way.

VapeOn.Cloud had the honor of being the first community on Telegram dedicated to vapers, marking an important milestone in the field of vaping and becoming a point of reference for enthusiasts from all over Italy.

My negotiation and networking skills have enabled me to establish strategic partnerships with major marketplaces, manufacturers and suppliers, allowing us to offer exclusive discounts to our users. Through these partnerships, we've made special benefits and unique promotions available to our community, strengthening the bond with members and creating a rewarding experience for all.

Furthermore, I have promoted and organized meeting events between community participants, facilitating the meeting of people with common interests and creating an environment for sharing and exchanging experiences.

The VapeOn.Cloud Community was an amazing experience, a place where vapers could feel part of a united and inclusive community. My role as Founder and Coordinator represented an exciting challenge, where I was able to put my skills into play to develop and promote a dynamic, welcoming and successful community in the world of vaping, but unfortunately it was left out due to the new and complex regulations on vaping, especially with the introduction of excise duties by the state.

Community Manager in the Crypto sector

I have also been for over 5 years community manager of various projects in the cryptocurrency sector, as Italy Manager for TON and ABCC Exchange

COMMUNICATION AND INTERPERSONAL SKILLS

Communication and interpersonal skills

My communication and interpersonal skills include:

- **Excellent team spirit:** I am able to work effectively within a team, contributing enthusiastically and supporting colleagues. My collaborative and positive approach fosters a stimulating and cohesive work environment.
- **Good Educational Skills:** I have demonstrated the ability to impart knowledge and skills to others. Both through teaching within companies and through the creation of guides, tutorials and documentation, I have made complex concepts accessible even to non-experts in the sector.
- **Good IT business skills:** I have developed a good understanding of the dynamics of the IT industry, enabling me to effectively manage business relationships and understand customer needs.
- **Good Communication Skills:** My past experiences have allowed me to hone my communication skills. I can express ideas and concepts clearly and effectively, making it easier to understand even complex topics.
- **Excellent teaching skills:** My ability to explain in a clear and engaging way has led me to be chosen as a teacher within companies. I am proud to have contributed to training and developing junior resources, transforming them into competent and efficient professionals.

Thanks to these communication and interpersonal skills, they are able to work in synergy with the team, manage relationships with customers and collaborators and communicate complex concepts effectively, contributing to the success of the activities and the professional growth of resources within the company.

Blogger for WindowsBlogItalia

As Blogger for WBI Windows Blog Italia, I had the privilege of being the creator and writer of the column The best games for Windows Phone. With periodic weekly releases, this column has been a point of reference for fans of games on the Windows Phone platform, achieving proven success.

My reviews had an innovative and comprehensive approach, including detailed evaluations for different aspects of the game:

- I evaluated the **Graphics**, making judgments on the visual quality and aesthetics of the game considering the limited resources available on a mobile device;
- The **sound sector** was another crucial element, with assessments regarding the soundtrack, sound effects and general audio experience;
- I paid particular attention to the **creativity of the game**, trying to identify original and innovative elements that distinguished the game from other titles on the market
- The game's **longevity** was evaluated based on its replayability and whether it could hold the user's interest over time;
- I paid particular attention to the **User Experience (UX)**, evaluating the ease of use of the interface, the intuitiveness of the gameplay and the presence of any bugs or technical problems;
- Finally, I gave an overall grade, summarizing the overall experience of the game.

Unfortunately, the address book was broken due to the theft of my only Windows Phone device. Since I no longer have a working device, I have had to suspend the publication of reviews.

However, the experience as Blogger for WBI Windows Blog Italia was extremely rewarding, as I had the opportunity to share my passion for video games and contribute to the community of Windows Phone enthusiasts. The reviews with their comprehensive and innovative approach received positive appreciation from readers and allowed me to further develop my skills of writing and sharing quality content.

OTHER SKILLS

Altre competenze

- FIGC football referee between 2008 and 2012, with active participation in international events KOMM MIT;
- Lover of innovative technologies;
- Requested guest at various events in the IT industry;
- Good imagination to face possible solutions from different points of view;
- Passion for the development of new technologies, designer myself when time allows me.

DRIVING LICENCE

Driving Licence: A1

Driving Licence: B

EDUCATION AND TRAINING

Advanced Programming for Blockchain & Bitcoin

cademy [2018]

City: Pordenone

Country: Italy

Website: <https://bcademy.it>

Level in EQF: EQF level 8

Durante il **Corso di Programmazione Full Immersion** di 12 settimane full-time presso cademy, ho partecipato a un'intensa formazione con esperti del settore focalizzata su diverse **competenze chiave nell'ambito della programmazione**. Le seguenti sono le principali aree di studio:

- **Programmazione blockchain:** Ho acquisito una conoscenza approfondita della tecnologia blockchain e delle sue applicazioni, imparando a sviluppare soluzioni decentralizzate.
- **Integrazione Exchange:** Ho approfondito le competenze nell'integrazione di piattaforme di scambio, apprendendo come implementare funzionalità di trading di criptovalute, tenendo conto che non fosse la priorità del corso in oggetto ma solo un aspetto da conoscere ai fini pratici.
- **Programmazione su Lightning Network:** Ho studiato in modo approfondito questo layer della blockchain di Bitcoin e ho imparato a sviluppare applicazioni basate su questa tecnologia all'avanguardia nel settore delle criptovalute.
- **Programmazione Server Side in Python 3.7:** Ho acquisito una solida competenza nella programmazione lato server utilizzando Python 3.7, imparando a sviluppare backend robusti e scalabili per applicazioni web e servizi.
- **Programmazione Client Side in HTML5 (JavaScript, CSS, HTML):** Ho imparato a creare interfacce utente interattive e coinvolgenti utilizzando le tecnologie front-end come HTML5, JavaScript e CSS, consentendo un'esperienza utente ottimale.
- **Programmazione Client Side Android (Android Studio con Java):** Ho acquisito competenze essenziali per sviluppare applicazioni Android utilizzando Android Studio e il linguaggio di programmazione Java, al fine dello sviluppo di un Wallet Mobile.

La **convivenza con colleghi di studio e docenti nella stessa abitazione** è stata un aspetto particolarmente significativo dell'esperienza. Questo ambiente di apprendimento full immersion ha creato un'atmosfera stimolante e collaborativa, favorendo un costante scambio di conoscenze e un apprendimento più approfondito. L'interazione costante con persone provenienti da diverse esperienze e contesti mi ha permesso di sviluppare una maggiore apertura mentale e la capacità di lavorare in team in modo armonioso e produttivo.

Inoltre, la convivenza con alcuni studenti che non mi stavano simpatici ha costituito una sfida che si è rivelata estremamente formativa. Ho imparato a gestire le differenze e a coltivare un ambiente di rispetto e collaborazione, sviluppando così preziose

competenze interpersonali. Questo aspetto dell'esperienza ha avuto un impatto positivo sulla mia crescita personale, migliorando le mie capacità di comunicazione, ascolto attivo e adattamento in situazioni sociali e lavorative.

Grazie a questa esperienza formativa completa e coinvolgente, ho potenziato il mio bagaglio di conoscenze e competenze nella programmazione e ho acquisito importanti abilità relazionali, rendendomi un professionista più completo e preparato per affrontare con successo le sfide del settore informatico.
